

The **Advanced** Materials **Marketplace**

Advanced Materials, Advancing Humanity

Problem

Innovation in Advanced Materials is outpacing adoption due to
“ Knowledge Gaps ”

The cost of inaction

Loss of **leadership** (innovate or perish)

\$164 billion^a lost opportunity (2020-2025)

\$1 trillion operational costs globally due to legacy material & component failure^b

The Buyer's Journey

Does it **exist**?

Does it **solve** my problem?

Where can I **find** it?

How can I **trust** it?

How do I **use** it?

The Valley of Death

15% of global patents don't become products due to a lack of piloting infrastructure^c. Scaling up requires small steps.

Solution

NorthStar Platform

AI Assisted Marketplace

A “Problem-First” marketplace that understands the **buyer’s problem** uses a **NorthStar Materials LLM** to create actionable recommendations, faster decisions and scalable adoption, therefore closing the Knowledge Gap.

Our Solution

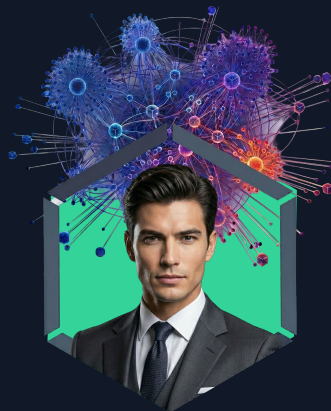

Introducing the **NorthStar Platform**:

**A web platform
where sellers can
upload their products
to buyers.**

**Smart recommendations
for which advanced
materials solve problem.**

**Agentic AI employees
that actively finds
clients and
ecosystem partners.**

Who we are

Dr. Jason Deacon
CEO

7 years of advanced product manufacturing leadership, built and managed 10+ advanced material products, generated \$10M in revenue and lead scientific initiatives of 30+ team members.

Ph.D. Materials U. of Cambridge

Principal Investigator @ SAIT

Lead Scientist @ GLC

Kejvi Peti
CTO

7-year software engineer who's shipped 12 production systems, including a CES 2024 on-device AI agent for smart lighting and a Fortune 500 AI platform for Anheuser-Busch used by millions globally.

MSc in AI U. of Leeds

Lead ML. Engineer Anheuser-Busch

Sr. SWE Nanoleaf

Rando Kaloti
CGO

8+ years of experience spanning consulting, complex implementations, and leading go-to-market strategy for new products in emerging markets.

Bachelor's of Business, TMU

Sr. Implementation Mgr. @ Dentsu

Consultant @ Deloitte

Kejsi Egro
Sr. Dev.

Jarad Collins
Sr. BD

Our Edge

Proprietary Technology

Cutting edge & patentable methodologies to create Knowledge Graphs reducing hallucinations and increasing accuracy.

NorthStar LLM

A tuned LLM with a materials knowledge focus that is trained on advanced materials data.

Team Knowledge

A cumulative 20+ years in product management, 10+ years in advance materials alongside a deep network of advanced material suppliers and users.

Go-to Market Strategy

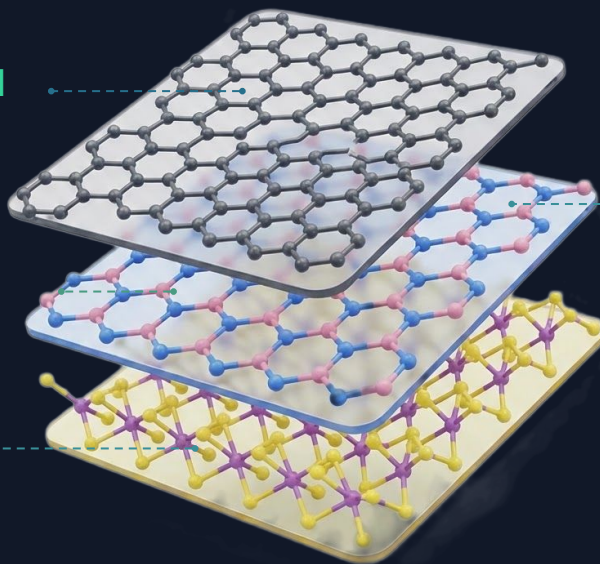

Revenue Model: *Our subscription-based (\$3000/month for AI Employees) & percent-based deal size pricing model (8%-15%) has been received well by our design partners.*

B2B Ecosystem Partnership Model

Institutions like Fraunhofer, The Graphene Flagship, the NRC groups and others produce and support our ICPs. Warm connections there will spread significantly.

Events & Technical Information

Educate others at events and on social media platforms how products featured on our website can be utilized in their specific industrial niche.

Vertical Markets

Advanced materials is vast, we have a monthly outreach program based on what is in high demand and profitable. E.G. Month 1 is Battery Materials, Month 2 is Photovoltaics.

Regions Enabled: Canada, US, Europe

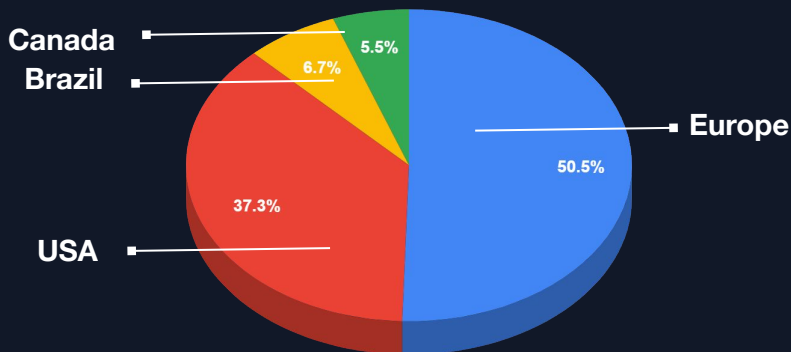

Market

*The global Advanced Materials market is experiencing significant growth and is valued at \$91.27B, while expanded to grow at a CAGR of 8.1% until 2030^a. There is a **market trend to using agentic AI for B2B sales**, **approximate 20% of the industry will use agents by the end of 2026^c**.*

\$15B TAM, 41600 Clients

Based on “High Innovative SMEs”

ICP: AE, R&D Engineer, C-Suite, Procurement.

Dealsize 5-25k initial, 2 million annual.

Benchmark: Sigma Aldrich makes ~ \$10 billion annually with their marketplace^b. Our goal is 0.1% of that after 2 years and 1-10% after 10 years.

Drivers:

- Technical expertise/skilled labour shortage.
- Difficulty sourcing domestic materials.
- Market immaturity; opaque pricing + demand.
- Global push for technology commercialization.
- Europe shifting to internal manufacturing capability.

Competitors

There are no true competitors that provide a marketplace functionality where buyers & sellers of advanced materials can interact and close deals from a problem-first perspective, because AI has enabled this.

Traction

Client Adoption

Two Letters of Intent and Development Partners secured with COROL (polyol) and Loless (seaweed composite).

User Waitlist

Current waitlist of 20+ users who are excited to be onboarded and utilize our platform.

Venture Lab Collaboration

We have access to Venture Lab's resources and their network in the Critical Industrial Technologies.

Google Startup Program

Dedicated support and resources to build.

Product Update

Functional MVP marketplace and AI Employee. Bringing users onto the platform. We need to scale & retain.

2027+

Category	Allocation (%)	Amount (\$)	Primary Focus
Talent 	55%	\$2,200,000	 AI/Material Science elite team.
Overhead 	20%	\$800,000	 Legal, IP, Rent, and Compliance.
Tech/Assets 	15%	\$600,000	 LLM compute, ASTM testing, Video.
Growth 	10%	\$400,000	 Beachhead GTM and Partnerships.

Planned Features

Toll Manufacturing

section to enable advanced material suppliers a way to globally produce and not require millions of investment for scale up.

Research Institution

collaboration section to enhance product development.

A Support Science

section that allows larger enterprise clients to find smaller research organizations to fix their specific problem.

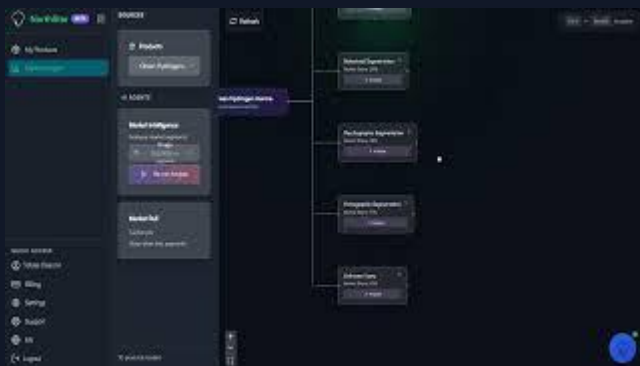

Expanded AI Employees Section

to assist Startups and SMEs with growth.
